Getting Started

• Installation - Complete guide for installing DD-WRT on your router
• Basic Wireless Settings - Info and Recommendations on Basic Wireless settings
• Advanced wireless settings - Info and Recommendations on Advanced Wireless settings
• FAQs - Everything from Where do I download dd-wrt, to how do I increase range.
• Glossary - Good to look up any unfamiliar dd-wrt term.

Basic Tutorials

These tutorials have content most new users will understand and be able to deploy. Category is here: Category:Basic tutorials

• Access Restrictions
• Access To Modem Configuration
• Ad blocking
• Afterburner/Speedbooster
• Captive Portal - hotspot
• Client Bridged
• Client Mode
• Configuration settings for UMA enabled phones
• CRON
• DNSMasq as DHCP server
• Easy SSH tunnels (securely surf the web anywhere / bypass firewalls)
• Easy torrenting with dd-wrt
• Port Blocking
• Port Forwarding (single/range/trigger/UPnP)
• Port Forwarding Troubleshooting
• Printer Sharing
• ProFTPd Server (including WAN or anonymous access)
• Quality of Service (QoS)
• Repeater Bridge
• Samba Filesystem
• Separate LAN and WLAN
• SmartDNS
• Spanning Tree Protocol (STP)
• SSH access from internet
• Sshfs
Advanced Tutorials

These tutorials require a certain degree of knowledge about general networking that some new users may or may not understand. Also, check out the Advanced tutorials Category

- Advanced Wireless Settings
- Additional USB ports and Internal HD on Asus WL500gP
- CFE backup
- Chillispot captive portal hotspot
- Comcast download speed fix for Linksys eSeries
- Configure RSS feed output
- Connection Limit Notifier
- DNS Category - DNSMasq, OpenDNS, etc.
- Dynamic DNS Category - DDNS, no-ip.com, etc.
- Dual WAN Category - Setup Guides
- One-to-one NAT (aka Static NAT)
- Optware Category
- Overclocking BCM 47xx CPU’s
- Peer-to-Peer (P2P) Throttling
- Pixelserv - Remove Ads on DD-WRT (requires JFFS)
- Policy Based Routing
- Preventing Brute Force Attacks
- Point-to-Point PPTP Tunneling with two DD-WRT
- PXE - Boot images with DD-WRT DHCP]
- Router as a Web Server
- Rsync Backup Server (win/mac/linux clients)
Installable Packages

This list covers additional software that can be installed on devices running DD-WRT. Optware also provides many NSLU2-Linux packages build specially for DD-WRT. Installing Entware is also supported and more modern than Optware, with even more packages.

- **Asterisk** - open source PBX VoIP system
- **BWlog** - Bandwidth Log - real-time bandwidth graphing.
- **iftop** - for ncurses-based monitoring of active connections and their bandwidth
- **Kismet Server/Drone** - using Windows to display results
- **Port Knocker daemon**
- **Miau IRC Bouncer** - keep IRC nickname and channels
- **Multi Router Traffic Grapher** - MRTG for dd-wrt
- **No-IP.com Client** - add No-IP.com DDNS
- **OpenNTPD** - Turn your router into a time server
- **OpenSwan** - IPsec for Linux
- **ProFTPd** - install ProFTPd and start via xinetd
- **VNCRepeater ipkg** - connect to multiple vnc servers behind a firewall
- **wrt54g kismet with linux server** - using a linux box to display results
- **Wiviz** - Real time wireless scan for signal strength and antenna testing
- **vsftpd** - FTP server
