WLAN Max Speed	450Mbps on 2.4Ghz / 1300Mbps on 5Ghz
Antenna Location	6x fixed internal
Switch	4x LAN + 1 WAN Gigabit ports
USB	1x USB 2.0

Flashing Info

This unit has community dd-wrt build support as of 21061.

File needed for flashing dd-wrt from stock firmware:

WZR-D1800H_MULTI.bin from the buffalo_wzr-d1800h folder See [Where do I download firmware?](#) for links.

You should be able to flash the MULTI.bin from within buffalo firmware's webgui. The MULTI.trx file is for upgrading existing dd-wrt installations. Please practice all the proper flashing procedures - hard resetting before and after flashing.
