

Can someone add about enabling syslogd?

## Move/Rename Warning

Note that mighty [www.utorrent.com/faq.php](http://www.utorrent.com/faq.php) contains link which reads exactly [http://www.dd-wrt.comhttp://wiki.dd-wrt.com/wiki/index.php/Router\\_Slowdown](http://www.dd-wrt.comhttp://wiki.dd-wrt.com/wiki/index.php/Router_Slowdown)

So better do not rename this page or at least let them know :)
