Small change to wireless scanner script for v24

I was getting bleed onto the second line using the provided (and very functional) script. I modified the code to shorten the length of the signal strength meter to fit nicely on one line

Change this:

```
fmt = "%s%-15s %s%"sigstrength"d "reset erase2end "\n %s %s%-4d %s%-4d %s%-4d %s%2s "
```

To This:

```
fmt = "%s%-15s %s%"sigstrength/3"d "reset erase2end "\n %s %s%-4d %s%-4d %s%-4d %s%2s "
```
