

## Talk:Support

When still on the old wiki, I took the liberty of rewriting this page into it's current state... --[145.99.213.194](#) 22:43, 11 Jun 2006 (CEST) (Ro-Maniak on the forum).

I added a section on "Understanding the different wireless modes". It seems it doesn't totally fit this page, since its not technically a problem. Having said that, I think it is very commonly misunderstood among noobies. I believe it deserves a slot somewhere in the Wiki; I'm just not sure where. I'd be happy if someone did a little editing on it too. I bottomed out a little myself on giving a real basic overview of Client mode, Client Bridge Mode, and Adhoc. Especially adhoc mode since I have never actually used it before.

## Merging with new wiki

This article should be probably split

common problems should and merged with [Index:FAQ](#)

and

ways to get yourself support should be merged with [Index:Support](#). --[Kubanczyk](#) 02:43, 19 Dec 2006 (CET)
