can someone plz merge them?!

## Nope

Why would you merge two unlike tutorials?? Bad idea!

Maybe it would be a good idea to give some examples of where you would use one type of repeater rather than the other. I've set up a UW repeater which is good for sharing internet. I can ping other computers on the main wireless network but can't share files. This seems a bit odd. Is that how it is supposed to be? Peter Martin 11th Feb 09

## RC7 Download Location

Would someone point out where to download RC7? It is not intuitive from the Downloads organization, and I'm sure I'm not the only person and I consider myself an expert! Thanks. [Ajshea](#) 17:53, 21 March 2008 (CET)

i have modified the page to include the link to the RC7 build downloads:
