

User:Wombat4741

Hi,

I'm trying to figure out how to post a question. So if anybody knows, please send me an email. Cause I can't find back what I've saved so far.

The use of this forum is still a mystery to me. I've read almost all of this DD-wrt stuff. I understand how to flash my router but I'm stuck with a minor question. Now I've spend hours to figure out how to post this question. And how to find back the answer.

I just can't figure it out. Please HELP.

I need to know how to verify my hash code to which code? The hash link is dead and I'm ready to flah but I'm not 101% sure my bin file is ok.

thx. wombat4741
