

User_talk:Togo

You've done an excellent job on the wl page. The only thing I'd like to see different is I wish the commands were easier to read:

Instead of:

`ver` get version information

`cmds` generate a short list of available commands

You could do:

`ver` get version information

`cmds` generate a short list of available commands

But it really would be nice to find a way to indent the definition/explanation for each term. The built-in Wiki formatting removes spaces. [AycbeKay](#) -HK

wasn't really anything... I just copied and pasted the text from the wl help message, and I added not a stroke of diference... but its defnitely valuable info, and if we format and structure the info over time and especially crosslink it with the rest of the wiki it will certainly greatly help people like me learning to get the most out of their WRT [togo](#) 04:52, 9 Oct 2006 (CEST)
